QGIS in your browser
Welcome

GeoNode is an open source platform for sharing geospatial data and maps.
If you have any questions about the software or service, join our mailing list.
Need help? Getting Started

1 Layer
Click to search for geospatial data published by other users, organizations and public sources. Download data in standard formats.
Add layers »

3 Maps
Data is available for browsing, aggregating and styling to generate maps which can be shared publicly or restricted to specific users only.
Create maps »

3 Users
GeoNode allows registered users to easily upload geospatial data in several formats including shapefile and GeoTiff.
See users »
